

Greenhouse NTI (Snow Day) Assignments

Matthew Lindsey

matthew.lindsey@edmonson.kyschools.us

Answer each of the following on your own sheet of paper using 1-3 paragraphs per day. Use complete sentences. On your paper include your name, class, and which NTI day you are answering. Keep this paper.

Day 1

Describe three advantages to growing in a modern greenhouse.

Day 2

Name three types of glazing (covering) for greenhouses. Give some advantages and disadvantages of each.

Day 3

How does a greenhouse manager decide the correct time to plant a specific seed?

Day 4

Describe three important qualities of growing media.

Day 5

Describe three factors that affect seed germination.

Day 6

For a tomato plant sold in the spring, describe the process to go from seed to sellable plant.

Day 7

Why and when do plants get transplanted into larger containers?

Day 8

Describe three important things that should be considered before building/starting a greenhouse business.

Day 9

How does a greenhouse producer decide which plants to produce?

Day 10

Describe three things that should be considered before applying fertilizer.
