

Veterinary Tech NTI (Snow Day) Assignments

Matthew Lindsey

matthew.lindsey@edmonson.kyschools.us

Answer each of the following on your own sheet of paper using 1-3 paragraphs per day. Use complete sentences. On your paper include your name, class, and which NTI day you are answering. Keep this paper.

Day 1

Describe the parts of the musculoskeletal system.

Day 2

Describe at least two stomach systems (monogastric, ruminant, nonruminant, avian).

Day 3

Describe the differences between an artery and a vein.

Day 4

Describe the process of respiration.

Day 5

List and describe the functions of the renal system.

Day 6

Explain the difference between antibodies and pathogens.

Day 7

Explain the difference between inflammation and infection.

Day 8

What is the function of protein?

Day 9

What is a balanced ration, and why is it important?

Day 10

Name and describe three common parasites in animals.
